Subject: Island Components Group request for Financial Assistance

To whom it concerns,

Island Components Group was established in Long Island back in 1992 with the goal of becoming a premier supplier of electric motor and actuators. Through a strong foundation in engineering the company quickly gained the reputation as a key motor design center. With the addition of a strong manufacturing team shortly thereafter, the company transitioned into a turnkey motor producer with extensive design, manufacturing and testing capabilities supporting mainly high end military and aerospace applications.

We moved to our facility in Holbrook back in 2016, when we outgrew our original Bohemia location. Island has continued to grow organically with the local Long Island Community, while also quickly acquiring new business opportunities which signaled the need to move out of our current facility and begin the search for a space that will allow for our current and future growth. We have simultaneously been looking for space nearby, as well as out of state in Florida as we weigh the costs of manufacturing, operations, and real estate in each area. Island currently sits at 7,500 square feet of manufacturing and office space, broken up in a modular set up. In order to facilitate our current business and backlog of future orders and forecasts we will need at minimum a 14,000 square foot facility laid out more efficiently for growth.

With the support of the Suffolk County IDA team, and specific language being added into the documentation we felt comfortable moving forward with a lease agreement to secure a 14,240 square foot facility in the Hauppauge Industrial Center, 210 Marcus Boulevard. This site is perfect for our current and future business needs. In our search this has been the only local facility to meet our needs due to low availability and high costs. This project will be a net growth of approximately 6,800 square feet with a much more efficient layout and design to align with our manufacturing needs. This project will include the need for reconstruction of the internal layout, as the prior tenant used the site for mostly office space. We will also be acquiring a significant amount of upgraded equipment such as advanced visual inspection machinery, a clean room, and additional manufacturing equipment to continue growing our business.

Island Components will greatly benefit if this project is approved due to a number of reasons. First and foremost, we have simply run out of space in our current facility which makes it increasingly difficult to operate as we need. This strains our internal staff and limits the new business we are able to take on. We also have a great base of local employees who support our operations, as well as a long history with dozens of local Long Island vendors who help support
our projects by manufacturing subassemblies, running testing, and packaging our military shipments. We also see the need to add an additional 17 employees based on our current demand and plan for growth. These positions will be a mixture of salaried engineering roles as well as manufacturing positions; both encompassing hands on and professional training to the employees.

As a key part of our strategic planning for this necessary move we have greatly weighed the costs of our business needs. Whether we continue to move forward with the current project at 210 Marcus Boulevard, or reconsider a move out of state is based on the financial assistance we are able to attain from the Suffolk County IDA initiative. Island Components is a small business with key customers in the aerospace, space and industrial markets. As a small business, costs are always a factor and our survival and more importantly growth is highly dependent on how we can keep operating costs low. Support of this project will allow for Island Components to minimize the financial hit of moving our operations locally and will allow for us to retain and grow with employees in the local Suffolk County area. Our company growth is directly tied into the people we hire as we flow down to our employees an ESOP stake and profit sharing. Support in the project will allow for Island to continue to share that growth with our local community, and our continued expansion in the years to come will continue to be a great success story for Long Island manufacturing.

Sincerely,

Bill Brown

LONG ISLAND FIRST POLICY

It is the policy of the Suffolk County Industrial Development Agency to strongly encourage Project Applicants to support LONG ISLAND FIRST. This means that to the greatest extent possible Project Applicants should consider purchasing goods and services from Long Island Based Providers, and that to the greatest extent possible all employment opportunities be provided to Nassau and/or Suffolk residents.

For purposes of this Policy, Long Island Based Provider means:
- Business having a physical location on Long Island; or
- Business with a history of performing work in Nassau and/or Suffolk County; or
- Business employing majority Nassau and/or Suffolk County residents.

The Policy seeks to cause a greater local economic impact of a project through support of Long Island Based Providers and employment of local workers and its multiplier effect on the Nassau and Suffolk County Region. There are direct and indirect benefits to the Region's economy as a result of a Project Applicant's spending and investment taking place locally (as opposed to not taking place at all or occurring out of the Region). A Project Applicant's direct local expenditures for employee salaries, supplies, services, raw materials and operating expenses create an economic benefit to the Region. This direct spending by a Project Applicant increases new economic activity by the businesses that initially received the direct spending and they in turn increase spending at other local businesses in the supply chain. A workforce and new employees create economic activity by purchasing goods and services from local businesses.

The Policy includes the construction and/or renovation phase of a project with respect to contractors and subcontractors and local workforce used during this period.

Complying with the Policy's Goals
- Project Applicants must annually provide the total dollar amount of all direct expenditures made to Long Island Based Providers (businesses, vendors, suppliers, etc.) along with a name list of all Long Island Based Providers included in the annual direct expenditure total.
SCHEDULE C

In the event that any of these conditions cannot be met, the applicant shall submit to the Agency an explanation as to the reasons for its failure or inability to comply with such conditions. Furthermore, this policy may be waived, in the sole and final discretion of the Agency, in the event that the applicant demonstrates to the Agency special circumstances or economic hardship to justify a waiver to be in furtherance of the purposes and goals of the Suffolk County Industrial Development Agency.

For the purposes of this policy, the term “Financial Assistance” shall mean all direct monetary benefits, tax exemptions and abatements and other financial assistance, if any, derived solely from the Agency’s participation in the transaction contemplated by the Project Agreements including, but not limited to:

(i) any exemption from any applicable mortgage recording tax with respect to the Facility on mortgages granted by the Agency on the Facility at the request of the Applicant;

III. Modification of Payment In Lieu of Tax Agreement

In the case of any Event of Default or Recapture Event, in lieu of terminating, suspending or recapturing the Financial Assistance, the Agency may, in its sole discretion, adjust the payments in lieu of taxes due under the Project Agreements, so that the payments in lieu of taxes payable under the Project Agreements are adjusted upward retroactively and/or prospectively for each tax year until such time as the Applicant has complied with the provisions of the Project Agreements.
